ARC
ACTIVE RECOVERY CENTER
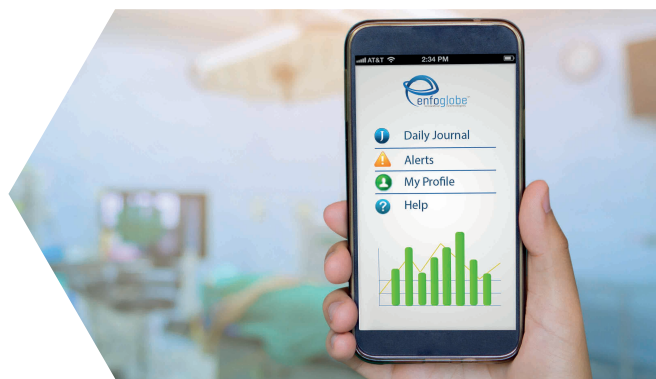

enfoglobe ™
INNOVATIVE TECHNOLOGIES

Active recovery center is a fully customizable multi-media platform that educates and motivates patients, monitors SUD treatment trends and provides individual feedback, there by reducing relapse and increasing success rates. ARC increases customer satisfaction, attracts patients, differentiates clinics with cutting-edge tools and improves patient care.

EDUCATIONAL MODULES

Multimedia educational intervention to increase understanding of ARC science and evidence-based treatment options.

MOBILE TREATMENT MONITORING

Help increase monitoring of patients and efficiency via a mobile health application. Mobile data integrated with Patient and Provider Portals for trends analysis.

FEATURES:

- Mobile health application and portals for tracking patient treatment adherence, mental health and craving status, urine drug screen results, schedules, plus communication tools and analysis of health trends.
- Multi-media animations to educate about SUD and treatments
- Provider and Patient portals with alerts and treatment analytics
- Mobile apps with customizable questions for each patient type

- Secure remote communication (video and chat) with patients
- Custom content development and feature extensions
- Hosted on HIPAA servers in a commercial server farm, Google GCP
- Interactive administration of all user roles, content, and access

ADVANTAGES:

GREATER PATIENT SATISFACTION
Client-centered care, providing patients with
the knowledge to advocate for their own treatment
helps achieve higher patient satisfaction thanks
to multi-media education and treatment tracking system.

BETTER PATIENT CARE
Computer-based visualization of the science behind
SUD and EBT treatment, communication modules,
trend analytics, mobile access, significantly improve
patients knowledge. ARC increases availability of care.

DIFFERENTIATE AND ATTRACT PATIENTS
Clinic stands out thanks to focused, highly accessible
SUD treatments using online and mobile tools
for patients and providers.

LESS ANXIETY AND GREATER SATISFACTION
Patients are likely to feel less anxious and better
informed when using interactive education and daily
progress tracking. Family members can be educated
and connected with patient.

COMMUNICATION WITH MEDICAL STAFF
Video and Chat Sessions allow patients to connect live
with the provider. Direct interaction builds a better
relationship with the patient.

REDUCE COSTS
Reduce patient health care costs with real-time
access and communications, data analytics,
and central database.

SUPERIOR SECURITY AND ACCESSIBILITY
Effectiveness of treatment grows thanks to trends
analysis, education, global access and high security
with HIPAA secure storage in the Cloud.

INCREASED EFFICIENCY
ARC increases efficiency of clinic operations
and monitoring of patients; increases recovery
through patient-centered approach and tools
for preventing relapses.

CUSTOMIZABLE
ARC allows to customize features
and content for each client.
