OVERSIGHT AND INVESTIGATIONS

Dear Prospective Info Tech Customers:

Info Tech is a consulting, integration and software development company based in my Congressional District in Gainesville, Florida. I am very familiar with this firm and can attest to the excellent reputation it enjoys.

The company has more than 30 years of experience in the design, development, integration, implementation and support of computer systems for public sector agencies, including development, maintenance, and support of the Trns•port® suite of construction management software products owned by the American Association of State Highway and Transportation Officials (AASHTO). Info Tech serves as the prime contractor for AASHTO and, currently, 42 state transportation agencies in the United States and Canada license the AASHTO Trns•port® system.

Through its subsidiary, Bidx.com, Inc., Info Tech operates the Bid Express Internet bidding system. The Bid Express service enables the submission of complete sealed, secure and digitally signed bids to agencies. It is used by more than 35 provincial and state transportation agencies in the United States and Canada to advertise and receive bids and to distribute electronic files. Info Tech's Appia® software is the newest web-based application that is providing the same high level of construction management functionality to the local government agencies throughout the United States, and is ideally suited for the European market.

Info Tech developed software is now installed in more than 40 state transportation agencies, several hundred cities and counties, three foreign countries, and over five thousand design consulting and highway contracting firms. The applications perform a range of functions from project estimation to contract proposal preparation to electronic bidding and construction contract management.

Info Tech staff are some of the finest professional talent in the information technology industry, including network communications experts, systems analysts, database designers, computer hardware and software engineers, project managers, technical writers and trainers who have demonstrated their ability to provide superior client service. As such, this firm enjoys my highest recommendation for your professional consideration.

Sincerely,

Cliff Stearns
United States Representative
