Re: Enfoglobe's Developers

Dear Margaret,

With yet another successful web development project coming to a close, I want to let you know what a pleasure it has been to work with your developers over the past six years. This latest web-based development project "AASHTOWare Project™ 3.01" is a multi-million dollar, highly complex development effort. The enterprise-wide software enables the management of construction information throughout the entire contract life-cycle; from cost estimation to proposal preparation, letting and awarding bids, construction, and materials management.

The excellent programming staff provided by Enfoglobe to supplement our development team contributed significantly to the success of the project. They are all of the highest caliber and well versed in the complex C#.NET programming technologies, design, and communication skills needed for the success of this project. In addition, they came up to speed quickly, integrated well with the rest of the team, and were able to contribute to the project from the very beginning. Their knowledge and experience also allowed them to make suggestions and develop tools/utilities to improve our processes. I know this was a direct result of the rigorous recruitment process you used in finding highly qualified developers for our project. As a result, it was a great benefit to our project to be able to supplement our development team with the high caliber team of developers you provided.

As the project nears completion, I would like to say thanks to you and your team of developers for helping to make this one of the most successful projects to date at Info Tech. Should a future need require additional programming staff, we will certainly contact you to provide us with additional developers.

Sincerely,

A handwritten signature in black ink that reads "Thomas Rothrock". The signature is fluid and includes a long horizontal flourish at the end.

Thomas Rothrock, Ph.D.
