To Whom it May Concern:

Re: Recommendation of Enfoglobe, Inc.'s LEXA, previously known as LitigationExpert

I served as Corporate Counsel for RTI Biologics, Inc., now known as RTI Surgical, from 2006 to 2011. During that time, I managed over one thousand unique complex cases in litigation across the United States. Initially, document management for the significant portion of this litigation was handled through costly and inefficient document management systems. A more elegant and cost-effective solution was urgently needed.

Enfoglobe, Inc. created LitigationExpert as the solution to our need. Their solutions-based team created seamless systems to load hundreds of thousands of documents into an easily searchable database. The system is accessible online but may also download the database onto a laptop. We used the online accessible system to create and share the database with attorneys, witnesses, experts and management across the globe. In the courtroom, where immediate access was needed, all documents were available on my laptop, at my fingertips in an easily searchable format.

In complex, documentary-evidence heavy litigation, the ability to access key information is pivotal. The security of information is also paramount, especially in healthcare related litigation. These features are combined with tools to track costs, insurance coverage, important notices and correspondence. LEXA gives control to attorneys to excel in litigation. I highly recommend this product.

Sincerely,
